# Capabilities Statement

## Company Overview

For over 25 years, Beacon Industrial Services has provided customized solutions for the industrial cleaning and maintenance of process equipment, mechanical systems, and facility infrastructure. We have expertise in predictive and preventative maintenance, and serve many Fortune 500 companies.

## Response

We provide timely response with a skilled workforce, advanced cleaning methods and a full range of necessary equipment. We conduct a site visit to analyze project requirements from which we provide a custom plan solution.

## Approach

Our approach to service is focused on improving the efficiency of equipment, minimizing your downtime which results in improved output with reduced cost.

## Scope

Our team provides customer services from ongoing day to day needs to plant shutdowns, outages, new equipment installation, and decommissioning. With our experience we perform cleaning outside the scope of training of in-house staff in difficult areas such as, confined space entry and rescue, and working at heights. We offer expertise in audits, corporate visits, regulatory compliance, and certifications, along with post documentation of project completion, and an additional level of quality control to support site personnel.

## Services

Production Assets/Machinery: Ovens, Proofers, Spirals, Mixers, Process Equipment, Coolers, Freezers, Presses, Molding Machines, Extruders.

Overhead/Structural Cleaning: Ceilings, Junior Beams, Conduit, Piping, Light Fixtures, Conveyors, Racking.
